

Migration Execution Steps

Adobe Edge Delivery Services Migration Workflow

Map old URLs to new EDS paths. Create 301 redirect rules to preserve SEO rankings and prevent broken links.

SEO & ROUTING

4a

5

Move Servlets/APIs to Edge Workers

Migrate server-side logic to edge functions. Handle forms, pricing APIs, search, and personalization at the edge.

EDGE FUNCTIONS

Setup Analytics/Tracking

Configure Adobe Launch tag management. Implement conversion tracking, event triggers, and third-party pixels.

ANALYTICS

5a

6

Migrate Custom Functionality to AEMaaCS

Port custom AEM components, services, and scheduled jobs to AEM as a Cloud Service architecture.

AEM MIGRATION

Migrate Meta-schema, Taxonomy, Workflows, Users

Transfer content taxonomies, metadata schemas, approval workflows, and user/group permissions to AEMaaCS.

AEM MIGRATION

7

8

Validate All Functionalities

Execute comprehensive QA testing. Verify all blocks, forms, APIs, accessibility (WCAG 2.1 AA), and performance targets.
